REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The claimed invention defines a unique wiper blade not taught by the prior art. In particular, one that includes bridge-like crosspieces at each end joining spaced spring strips. The crosspieces are spaced from upper band surfaces of the spring strips in their middle sections and the spring strips are spaced from one another a distance less than the bridge width. A plastic cover cap is placed on the crosspieces at each end. This combination of elements does not appear to be fairly taught by the prior art.

Although the claims in this application may be subject to a provisional double patenting rejection in view of copending US application 10/031,828, such would be the only rejection. Thus, the application is being allowed as it has the earlier effective US filing date of the two applications. The double patenting rejection will be maintained in the 10/031,828 application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
